OverviewHistoryElectrochemistryChargeDischargeCompared to other battery typesApplicationsSee alsoA nickel-metal hydride battery (NiMH or Ni-MH) is a type of rechargeable battery. The chemical reaction at the positive electrode is similar to that of the nickel-cadmium cell (NiCd), with both using nickel oxide hydroxide (NiOOH). However, the negative electrodes use a hydrogen-absorbing alloy instead of cadmium. NiMH batteries can have two to three times the capacity of NiCd bat...

India's public electric vehicle charging stations multiplied significantly from 1,800 in February 2022 to 16,347 by March 2024. However, with 50 million EVs expected by 2030, about 1.32 million chargers will be needed, necessitating 400,000 annual installations. Government initiatives and industry efforts are crucial to meet this growing demand.
