Identifying a Dead Battery. If your lithium-ion battery is not working, it may be dead. To identify a dead battery, use a multimeter to check the voltage. A fully charged lithium-ion battery should have a voltage of around 4.2 volts. If the voltage is significantly lower than this, it may be a sign that the battery is dead or damaged.

Replace the Battery. If all else fails, the lithium-ion battery itself might be the problem. In such cases, contacting the device manufacturer or a professional technician is advisable to obtain a replacement battery. Ensure ...
