I just mounted 600W of lightweight flexible solar panels to the roof of my jeep camper. After years full time on the road around the world I have strong feelings about the best way to mount and use solar, here are my reasons: 600W is probably overkill for this vehicle, but to be honest I don't know for sure. For the first time I have an ...

The 12V/24V in product titles (ex. 100W 12V Monocrystalline Solar panel) does not refer to the actual voltage (Voc or Vmp) of the solar panels, but rather to the voltage of the solar system or energy storage system to which the panel is best suited. The voltage of the solar panel must be higher than the solar system voltage.
