In most business cases for heavy-duty equipment the Lithium Iron Phosphate battery is the best way to go. These batteries are cheaper than Li-Ion batteries, but also very heavy and large. Using the Power Battery technology we can pack two to three times more power and energy in the same volume and weight.

Additionally, when charging lithium batteries in an RV or marine battery system, a DC-to-DC converter can be installed between the alternator and the lithium battery bank to restrict the amount of current the battery draws from the alternator.
