

800ah battery pack production

I have a device that uses a pair of 1.2 volt NiMH rechargeable AAA batteries at 550 mAh (Philips HB550L). Would it be harmful at all to replace these batteries with rechargeable 1.2 volt AAA Duracells (or other brand) at 800 mAh or even 13000 mAh? Would it be safe, would it affect longevity of the device or batteries?

Consult Shoto / Shuangdeng Group Company Limited's EXC-800ah brochure on DirectIndustry. Page: 1/2.

VARTA 56703 Rechargeable Ready2Use Pre-Charged AAA Micro Ni-Mh Battery (4-pack, 800 mAh), rechargeable without memory effect . 4.5 out of 5 stars 54,541. £7.87 (1.97 /count) Was: £8.11. Power banks with a medium capacity range from 7,000 to 10,000 mAh. If you frequently rely on your phone when traveling, it could take some time until you find a wall charger. This selection of power banks could be ideal for you. A high-capacity power bank should be your pick if you require a bigger-capacity power source for a longer amount of time because ...

A brand-new battery will take less time to charge than an older one that's been used extensively and is starting to lose its capacity. If your battery is showing signs of age (e.g., it doesn't hold a charge as well as it used to), then it may take longer to charge fully. In any case, when charging a 7.2V 1800mAh NiMH battery, be sure to ...
