

Moreover, the policies, regulations and strategies in national level are quite useful for promoting the development of new energy vehicle industry. For instance, it has been found that establishing hydrogen development prior strategy in China is the most effective and important measure to promote hydrogen economy in China (Ren et al., 2015a ...

Analysis of the Li-ion battery industry in light of the global transition to electric passenger light duty vehicles until 2050 LorenzoUsai1,*,JacobJ Lamb2,EdgarHertwich1,OdneStokkeBurheim2 and AndersHammerStrømman1 1 Industrial Ecology Programme, Department of Energy and Process Engineering, Norwegian University of Science and Technology,

Re-examining EV industry's policies, it can be found that the impact of mineral resource shortage is generally underestimated when the EV industry development goals are set. The success of green transition in China's road transportation sector calls for the cooperation among more related policy administrations.

development of power battery is the core of the progress of new energy automobile industry. In this paper, CATL as an example of analysis, compared with GOTION HIGH-TECH, a detailed analysis of the financial situation of the two companies, CATL and the whole new energy power battery industry to predict the future development prospects. 2.

In the end, this paper proposes policy recommendations for the future development of China's NEV's battery industry from the perspectives of technology, market, and industrial chain.

The increase reflects a 41% increase in electric car registrations and a constant average battery capacity of 55 kilowatt-hours (kWh) for BEVs and 14 kWh for PHEVs. Battery demand for other transport modes increased 10%. Battery production continues to be dominated by China, which accounts for over 70% of global battery cell production capacity.

This study provides a comprehensive analysis of global patent trends in battery recycling, focusing on secondary batteries and related technologies across Korea, China, and the United States. The methodology ...

Among them, two are related to accelerating the development of the NEV battery industry, two are related to battery recycling, one is related to battery production, one is related to battery sales, and three are related to subsidies, including interest rate support and cash subsidies (each policy may involve multiple aspects of the NEV battery ...

industry, nation, policy, condition, regulation, meet, complete, and producer responsibility, which indicate the central government em- phasizes the development of a deliberated and systematic PBR ...

Electric Vehicle Battery Industry Research Report 2023-2024 & 2030: Development of Solid-State Batteries Sets the Stage for Market Transformation ... Regional Analysis: Gain insights into the U.S ...

Thanks to China''s " three verticals and three horizontals " strategy and the important deployment of new energy policies, the new energy vehicle industry has developed rapidly. The rapid development has also led to some problems. From a macro point of use, patent is an important index to reflect the technological innovation of the industry, which can ...

The Industry Development program will provide evidence-based advice to inform government policies and regulations and secure public trust for new energy technologies. ... Demonstrating market advantage through certification and life cycle analysis for Australian battery materials.

in lithium-ion batteries, for example within a Battery Industry Strategy formulated in 2022. South Korea aims for international leadership regarding its battery industry. The comprehensive Korean-battery strategy from 2021 shows a clear R& D focus on commercializing three types of advanced batteries (lithium-sulfur, lithium-metal

Lithium-based new energy is identified as a strategic emerging industry in many countries like China. The development of lithium-based new energy industries will play a crucial role in global clean energy transitions ...

In the past few years, the Chinese government has issued a large number of policies and plans for the NEV industry, including purchase subsidy policies, energy ...

The contributions of this article are: (1) to use text mining technology to screen the NEV industry policies issued by the Chinese government and to introduce text measurement methods into policy evaluation; (2) to study representative policy texts and to construct a policy modelling consistency (PMC) index model for quantitative evaluation of ...

This paper summarizes China's battery industry's recent national policies, technology, and industrial characteristics, analyzes the impact of new battery strategic initiatives by South ...

Power batteries, the core component of the rapidly evolving electric vehicle industry, have increasingly become a focal point of attention. Recycling power batteries can mitigate environmental pollution and utilize resources efficiently, which is crucial for fostering a low-carbon economy and achieving sustainable development. Utilizing prospect theory, this ...

With reference to common practices in academia (Du et al., 2021; Wang, 2021b; Yuan et al., 2020), this study explored the characteristics of China''s power battery policy in four ...

We present four types of waste battery recycling policies for analysis and use a discrete choice model for empirical analysis. Therefore, the more detailed setting and differences in research methods make our study significantly different from existing studies. ... New Energy Automobile Industry Development Plan (2021-2035) (in Chinese). http ...

Promoting the development of new energy vehicles (NEVs) has become an essential strategic selection to decarbonise the transport sector and facilitate carbon neutrality for many countries (Kastanaki and Giannis, 2023; Melin et al., 2021). As the largest NEVs market worldwide, China''s power battery has entered the phase of largescale retirement (Li et al., 2020).

A new study by Fraunhofer ISI on behalf of the BMBF analyses the battery policies of countries worldwide, including Japan, South Korea, China, the USA, Europe and ...

Besides, the waste battery recycling industry, through processes involving sorting, extraction, and reuse of valuable metals, not only generates employment opportunities and drives economic development, but also reduces the manufacturing costs of new batteries and enhances the overall sustainability of the battery industry. 27 Consequently ...

Analysis of challenges and opportunities in the development of new energy vehicle battery industry from the perspective of patents. ... which can provide reference for the long-term development of the industry. From the microcosmic point of office, patent is the embodiment of the strength of research and development and core competitiveness of ...

In addition to business models, government policies are driving the rapid development of the energy storage industry in the United States. Following our analysis of energy storage policies in Germany and China, we will analyze and summarize US energy storage policies. Federal government measures to drive energy storage development.

aims to assess the effectiveness of subsidy policies in promoting the battery swapping model and whether policy synergies or coordination failures occur between the dual credit policy and the battery swapping station subsidy policy. The ...

In recent years, with the rapid spread of next-generation vehicles (NGVs), China, Japan, and South Korea (CJK) have been leading the development of vehicle batteries. As development strategies and policy trends of NGVs battery are changing in CJK, the competition among battery manufacturers is expected to become more intense in the future. However, ...

Abstract A system dynamics-based evolutionary game theoretical analysis is proposed to examine the impact of policy incentives, i.e., price subsidy and taxation preference on electric vehicles (EVs) industry development. Two case scenarios were used to distinguish policy performance by dividing it into a static and

dynamic incentive. The result reflected that ...

The rapid development of China's economy, continuing improvement in the living standards of its people, and the significant increase in privately owned cars have led to massive consumption of oil and consequently to severe environmental pollution (De Melo et al., 2015; Bian et al., 2016, 2017). Since the 20th Century, countries all over the world have ...

Battery Policies: A cross analysis of international public battery strategies focusing on Germany, EU, USA, South Korea, Japan and China

In the past few years, the Chinese government has issued a large number of policies and plans for the NEV industry, including purchase subsidy policies, energy conservation and emission reduction policies (Wu et al., 2021), and supporting industrial policies for battery charging piles (Yang et al., 2013). These policies can be summarized in the ...

While the average battery size for battery electric cars in the United States only grew by about 7% in 2022, the average battery electric car battery size remains about 40% higher than the global average, due in part to the higher share of ...

Draft report of the policy analysis study on electric vehicles in the Philippines. Includes a stocktaking of the global and local EV policies, programs and industry, Local market modeling, cost ...

Subsequently, related policies are analyzed via content analysis systematically. Finally, recommendations for promoting of ChinaâEUR(TM)s new energy vehicles put forward. 2 Policy analysis framework of new energy vehicles It is essential to establish a reasonable policy analysis framework to analyse whether the policy system is perfect or not.

Financial and economic analysis of battery swapping and battery recycling businesses ... Considering the growing battery industry, ... development Key findings -Battery policy & regulations. @2022 Deloitte Touche Tohmatsu India LLP. Battery Ecosystem: A Global Overview, Gap Analysis in Indian context, and Way Forward for Ecosystem Development ...

Therefore, this paper will use patent analysis method, collect domestic 2002-2019 new energy vehicle patent data, analyze the current situation of china's new energy vehicle industry technology ...
