Capacitor boots insulate capacitor terminals and prevent nuisance shocks, an important safety consideration for manufacturers and service technicians. The non-conductive, UL-approved neoprene material used to produce APR capacitor boots passes a 1000-volt high potential test with leakage current less than 5 milliamps. Please reference UL file number SA12440. We can ...

In SMT capacitors and miniature capacitors with rubber-bungs, extensions of the tabs are the capacitor terminals. But in large-can capacitors like snap-ins and screw-terminal styles, the tabs are riveted or welded on the underside of the capacitor tops to terminal inserts. Welding produces the lowest contact resistance and highest current handling.

ASC Capacitors Capacitor Boot, Rubber, With Single Hole on Top, Black, Neoprene, 50 Durometer

EPDM Rubber Caps and Rubber Covers are chemically inert, so provide excellent resistance to harsh chemicals. They also have good high temperature resistance 150°C intermittent. EPDM Rubber Caps and Rubber Covers are appropriate for almost any application that requires a tight seal and a durable closure.
