o Dangerous goods and goods too dangerous to be transported are identified in the ADG Code. o Much of the terminology used to describe dangerous goods is defined in the ADG Code. o The storage and handling of dangerous goods of Classes 1, 6.2 and 7 is outside the scope of the national standard and this national code of practice.

Smaller amounts of flammable substances can be stored in an approved metal cabinet (ask your safety supplier for help). Very large amounts, or particular types of substances, may need to be kept in a dangerous goods store or separate building. Seek specialist advice to find out what you may need to do in these situations.
