

Balkan Peninsula Energy Storage New Energy Plant Operation Information

Jadranski Naftovod has bought the Bulinac solar power plant with a capacity of 5.2 MW, as part of its plan to diversify its business and become an energy company. Croatian oil pipeline and storage operator Jadranski Naftovod (JANAF) said that through its subsidiary JANAF OIE it has bought 100% shares of Prudens Consilium and with it the Bulinac ...

New biogas plant in Lozovo, North Macedonia powers 4,000 homes with renewable energy and fertilizer production July 8, 2023; Turkish company to build gas pipeline ...

These announcements were made by the Minister of Energy, Victor Parlicov, during the Romanian Energy Symposium held from September 11 to 13 in Bucharest. According to the Minister, other options are under consideration to create at least three lines that would ensure the stable operation of the continental integrated energy system, ENTSO-E.

We investigated taxonomic and endemic richness, patterns of spatial distribution, cenotic and spatial diversification, and chorological and life form spectra of montane coniferous forests in the central part of the Balkan Peninsula. We collected information on 1435 taxa (1351 at the level of species and 84 subspecies) with 65,289 species-occurrence data, ...

The Obrovac solar power plant in Croatia was officially put into operation on Friday (12.05). The Obrovac solar power plant worth was EUR 6.9 million and is currently the largest solar power plant in commercial operation in Croatia. It has been in regular operation since November 2022.

Strategic reserves of LNG gas have started to fill up in new floating gas storage near Greek Revitusa located near Athens. Decision to deploy floating LNG storage was taken by Greece to battle current energy crisis and be more prepared for upcoming winter. Floating gas storage will ensure a sufficient supply of natural gas if needed.

periods of renewable energy production with peak load demand, energy storage units are employed. Soleimani et al. [94] delve into optimizing integrated electrical and water energy networks, with ...

The aim of this research is to discuss current trends in renewable energies in Western Balkans countries, and to analyze the policies promoting and barriers to RES ...

Balkan Peninsula Energy Storage New Energy Plant Operation Information

The article is devoted to revealing the main problems and prospects of the energy industry on the Balkan Peninsula. Due to the lack of natural resources and the low ecology standards of current ...

With a change in regulation on November 19, Turkey made it possible for energy storage developers to get preliminary licenses for a matching capacity in wind or solar power. Investors rushed in, Y?lmaz said. New applications have been received for 19.9 GW in solar power and 47.5 GW in wind power, in combination with storage

The energy system in the EU requires today as well as towards 2030 to 2050 significant amounts of thermal power plants in combination with the continuously increasing share of Renewables Energy Sources (RES) to assure the grid stability and to secure electricity supply as well as to provide heat. The operation of the conventional fleet should be harmonised with ...

In January, Albania's transmission system operator, OST, said that wind and solar power plants connected to its network should reach a combined 220.4 MW in 2023, an almost tenfold increase from the current capacity.

Balkan Green Foundation has created the Balkan Energy Prospect () to represent an open, resourceful, and informative platform for ...

it may entail higher costs and different regional energy mixes, unless adaptive measures are deployed, such as increased plant efficiencies, replacement of cooling systems and fuel switches. Private stakeholders in the energy system and EU and national policies should reinforce the right market framework to ensure that the

Bulgaria has a proven 50-year track record in the safe and secure operation of its Kozloduy nuclear power plant, according to outgoing Prime Minister Nikolay Denkov. He said investments in new-generation technologies and diversification are the cornerstone of ...

Monsson Group is due to get regulatory approval for a hybrid power plant project consisting of a wind farm, photovoltaic unit and the largest battery energy storage system in Romania. The Romanian Energy Regulatory Authority (ANRE) is about to give the green light to Monsson Group for a hybrid wind-solar-storage facility in Dobruja (Dobrogea ...

27 July 2024 - Up to 20% of renewables capacity is expected to face curtailments by 2030 in Greece if no new investments are made in energy storage. ... especially for pumped storage hydropower plants. ... 28 June 2024 - Cyprus plans to launch a tender in September to support the installation and operation of battery energy storage systems of ...

gas drillings in Bulgaria's "Khan ...

E2S Power, a joint venture between Swiss SS& A Power Group and German company WIKA, has presented its innovative thermal energy storage technology, TWEST, which provides a solution for intermittent production from renewable energy sources and enables thermal power plants to switch to CO2-free operation.

Electrical energy news from 13 countries of the Balkan region: Serbia, Montenegro, Slovenia, Croatia, BIH, Albania, Greece, Turkey, Kosovo, Macedonia ... 30 October 2024 - V2G technology can cut the need for stationary battery storage by up to 92% by ... 29 October 2024 - Gamma-Sungrow FPV won the contract for the construction and operation ...

UGT Renewables and Hyundai Engineering are negotiating with the Government of Serbia on a strategic partnership to build a group of photovoltaic plants with a combined peak capacity of 1.2 GW and batteries for ...

Bulgaria relying heavily on energy storage in green transition. Bulgaria already held the first two tenders for battery energy storage systems (BESS) that would be integrated with renewable electricity plants. Renalfa IPP commissioned its first utility-scale battery energy storage system in June. The 25 MW - 55 MWh facility in the town of ...

CMS Belgrade advises UGT Renewables on landmark 1 GW solar and battery storage project in Serbia. 28 October 2024 - CMS Belgrade has advised UGT Renewables on ...

Italy is launching a state aid package of EUR 17.7 billion for the establishment of a centralized electricity storage system. The scheme is for developers of eligible projects to receive annual payments for investments and operating costs over the next ten years.

The hydropower plant operator and electricity supplier and trader is part of state-owned utility Bulgarian Energy Holding or BEH. "The Chaira PSHP is extremely important for Bulgaria's energy sector, as it is a giant energy storage system. With the introduction of more and more renewable energy sources, these systems are key," the ...

In total, there were 24 solar projects of an overall 3,278.5 MW, 18 wind power plants with a combined 3,239.4 MW, and one hybrid power plant of 150 MW in capacity. Pumped-storage hydropower project Bistricea, with a proposed capacity of 656 MW, was also on the wider list together with four other hydropower plants and three substations.

Bulgaria is leaning strongly on energy storage in its decarbonization efforts. Such systems are essential for the integration of wind and solar power as they are intermittent - depending on weather. The country had a hard time navigating the recent energy crisis since major breakdowns took the Chaira pumped storage hydropower
