

Balkan Smart Capacitor

A motor capacitor [1] [2] is an electrical capacitor that alters the current to one or more windings of a single-phase alternating-current induction motor to create a rotating magnetic field. [citation needed] There are two common types of motor capacitors, start capacitor and run capacitor (including a dual run capacitor). [2] Motor capacitors are used with single-phase electric ...

HZ-82J series anti-harmonic smart capacitor is based on one (type or (Y type) voltage power capacitor as the main body adopts microelectronics hardware and software technology. Latest technological achievements such as micro-sensor technology, micro- network technology and electrical manufacturing technology, it is intelligent, realizes low-voltage reactive power ...

The new smart capacitor modules can replace passive capacitors in general power electronic applications, especially for AC and DC-link applications, online damping for stability, adaptive energy buffering etc. ...

Recently, various smart electronic devices with different functions, such as self-healing, shape memory, electrochromism, and photodetection, have been developed. 31-33 In order to further integrate these advanced electronic devices with their power sources into self-powered smart electronic devices, smart supercapacitors have to be considered.
