

Battery Swedish general agent

Swedish battery maker Northvolt's decision last month to scrap a major factory expansion in northern Sweden puts on hold key funding for the company that was agreed earlier this year, a Swedish ...

STOCKHOLM, SWEDEN: DECEMBER 2023 -Enerpoly (enerpoly), a zinc-ion battery innovator, has been awarded an \$8.4M / 88.5M SEK three-year grant from the Swedish Energy Agency (energimyndigheten.se), enabling the Stockholm company to demonstrate their patented technology with the world's first megafactory to manufacture zinc-ion batteries. This grant marks ...

The loss of 1,600 jobs in Sweden comes as electric car sales slump in Europe and the continent lags far behind China in battery production. "While overall momentum for electrification remains strong, we need to make sure that we take the right actions at the right time in response to headwinds in the automotive market, and wider industrial climate," Northvolt ...

October 10, 2023. All eight batteries are now in place at Stockholm Exergi and Polar Capacity's battery park in Haninge. The park is one of Sweden's largest, and when operational, it will add a total of 20 MW to the electrical system--a much-welcomed addition for a continued secure and reliable power supply in the Stockholm region.

The timing of Northvolt's innovation took the battery industry by surprise. According to Daniel Brandell, a materials chemist at Uppsala University in Sweden, technology roadmaps in North America and Europe had put this development closer to 2030 than prior to 2025. While Chinese companies were first to use sodium to replace lithium in batteries, ...

A new IVL report commissioned by the Swedish Energy Agency targets climate emissions associated with electric car battery manufacture. The study is based on life cycle analyses and is an update of an earlier report from 2017.

STOCKHOLM, March 26, 2020 /PRNewswire/ -- Swedish battery technology development company TEXEL Energy Storage AB (TEXEL) receives support from Swedish government agency Vinnova to develop and ...

Swedish battery technology development company TEXEL Energy Storage AB (TEXEL) receives support from Swedish government agency Vinnova to develop and demonstrate a new unique battery technology, originally developed in collaboration with, among others, the US Department of Energy (DOE), and one of their laboratories, Savannah River ...

The Swedish Transport Agency is responsible for most regulation and supervision in the transport sector, and for deciding on permit applications and maintaining records. The Agency has overall responsibility for producing regulations and ensuring compliance. Its activities encompass all modes of transport, i.e. roads, railways, aviation and ...

More than 100 representatives from public and private sectors along the battery value chain answered to the joint invitation of InnoEnergy, the Swedish Energy Agency and Business Sweden. Ibrahim Baylan, Swedish ...

Ensure environmentally friendly production of materials, electrodes and battery cells through the use of LCA and recycling-by-demand; Support end-users in Sweden with battery test procedures and cutting-edge scientific evaluations of their test results

Swedish battery storage trading and optimization company Flower is rapidly growing its project fleet, now acquiring one of the nation's largest sites. The project is a ready-to-build 40 MW/80 MWh battery energy storage system (BESS) site developed by Nasdaq Stockholm-listed renewables developer Arise.

Swedish police will investigate whether the unexplained deaths of three electric car battery factory workers are linked, the force said Thursday.. Though the police said they do not suspect foul ...

Insights on the Nordic battery value chain: an assignment from the Swedish Energy Agency, delivered by Business Sweden. This report is constantly updated. Date of latest update: 28th June 2023

Northvolt AB is a Swedish battery developer and manufacturer, specialising in lithium-ion technology for electric vehicles. [4] Founded in 2015 by two former Tesla executives, it commissioned its first manufacturing plant in Skellefteå, Sweden in 2021 and has announced plans for five others in Europe and North America.

The funding will support initiatives to prove that zinc-ion batteries can reduce carbon emissions in energy storage, strengthen European competitiveness, and help diversify the battery supply chain. The Swedish Energy Agency has supported 250 startups with approximately EUR90 million (\$100 million), helping drive sustainable growth.

October 10, 2023. All eight batteries are now in place at Stockholm Exergi and Polar Capacity's battery park in Haninge. The park is one of Sweden's largest, and when operational, it will add a total of 20 MW to the ...

Altris reaches new milestone with 160 Wh/kg battery cell. The Swedish sodium-ion battery developer Altris presents a sodium-ion battery cell that has been validated for a best-in-class energy density of over 160 Wh/kg. This makes ...

"Our team helped Kedali review the European battery opportunities they find important and how the Swedish site can meet future needs of the supply chain. We started from a relatively low awareness level when it comes to Sweden's role and capacity. The general impression in China is that Sweden is attractive but not affordable.

Altris reaches new milestone with 160 Wh/kg battery cell. The Swedish sodium-ion battery developer Altris presents a sodium-ion battery cell that has been validated for a best-in-class energy density of over 160 Wh/kg. This makes Altris' battery cell commercially viable for applications such as cost-efficient and sustainable energy storage ...

Scania-Vabis becomes the Swedish general agent for Volkswagen. This evolves into a very profitable business for the company and makes the company set up a closely-knit network of dealerships that serves cars as well as commercial vehicles. 1.7 million are cars sold during Scania-Vabis' involvement, which lasts until 2002, when Volkswagen in Germany becomes the ...

Under the deal, SK On will supply battery cell modules to Polestar for its flagship four-door grand tourer EV model, Polestar 5, beginning 2025, according to SK Group's battery-making unit. The company said Polestar 5 will be powered by SK On's ultra-long high-nickel batteries comprised of 56-centimeter-long cells.

Research on the structural battery has been ongoing for several years. The researchers announced a previous milestone in 2021, when the battery had an energy density of 24 Wh/kg, which corresponds to around 20 per cent of the capacity of a comparable lithium-ion battery. Now it is up to 30 Wh/kg.

The Swedish sodium-ion battery developer Altris receives support from the Swedish Energy Agency within the programs Industrial Leap and NextGenerationEU. A total of SEK 77 million has been granted for the ...

Parts of the tests involved flooding an isolated EV battery cell with water several tools, on this picture an E-Extinguishing lance was used. A report from tests made public by the Swedish Civil Contingencies Agency (MSB) shows that a cutting extinguisher can safely put out a battery fire in a very short time, with minimal use of water and without the risk of re-ignition.

Swedish police will investigate whether the unexplained deaths of three electric car battery factory workers are linked, the force said Thursday. Though the police said they do not suspect foul play, the deaths have cast a shadow over one of Europe's leading electric battery producers, with Japanese car giant Toyota pulling its workers from the ...
