It facilitates any enterprise to obtain individual rights to use, allocate or allot a trademark which can be done through the process of Trademark Registration dia has a huge competitive market for business where ...

How to register a car battery. Battery registration is typically performed by a dealership. Battery registration requires a scan tool (or related OBD-II device) that can communicate with and perform battery registration on the specific vehicle. Different vehicles require different user inputs/battery information and specific scan software.

The registration procedure results in a registration certificate which has legal status, allowing the owner of the registered trade mark the exclusive right to use that mark. CIPC administers the Register of Trade Marks which is the record of all the trade marks that have been formally applied for and registered in the Republic of South Africa.
