

Battery damage meter

Understanding Battery CCA. When it comes to understanding battery CCA, knowledge is power - quite literally! CCA stands for Cold Cranking Amps, which refers to the amount of current a battery can deliver at 0 degrees Fahrenheit (or -18 degrees Celsius) for 30 seconds while maintaining a voltage above 7.2 volts.

Common replaceable batteries like AAs and AAAs degrade and start to break down over time, and a chemical reaction causes corrosion. Corrosion can stop the flow of electricity and damage your device's metal contacts. Use this guide to remove corrosion and clean the battery terminals in your small electronic devices.
