The one from the battery to the starter, I have done a few times. Because the original cable merges into the main wiring harness, you (1) can't remove them and (2) have to route a new, independent cable. The old positive battery terminal end, and the ring at the starter, will no longer be used. Just zip tie the out of the way.

ALLDATA DIY Repair Help; Find a Repair Shop; Repair Help; In-Store Services; ... Your battery is a key component that provides the crucial power that your car, truck or SUV needs to run. Yet even when your battery's in good shape, a faulty set of terminals can still ground your vehicle. Get back on the road and shop AutoZone for the best ...

Long story short, blown the fuse that is located on the battery wires that connect to the battery. Was sold the wrong battery wasn't paying attention put negative to positive and vice versa. I am wondering if there is anything else I might expect. I ordered the part from nissan today \$90.

when the negative terminal is disconnected, it can't arc, only the negative battery post itself can (that's where the juice is coming from). As for the sparks you saw, those are normal when reconnecting a battery and the battery charge has changed a little bit since the connection was broken. This does no harm to the battery.

If the fuse blows, the indicator light goes out, indicating the need for fuse replacement or troubleshooting the underlying issue. The two-pole design means that the fuse holder has two separate circuits or conductors, allowing it to protect both positive and ...

A 1 pole battery fuse holder refers to a device used to hold and protect a fuse in a battery circuit. It is designed

## Battery negative pole fuse repair

to provide a secure and convenient means of installing and replacing fuses in battery-powered systems. The term 1 pole to a ...

I look up the details and it says battery and battery terminals and cables excluded. OK still N/P how much can a replacement terminal / cable cost? Well what Ford sells is not a "battery cable / terminal. it is a positive power harness that has about 10 connections throughout the engine bay and costs over \$400.00 !!!!!
