

Battery not detected after reinstalling system

I am not aware of any software settings that can cause a system to not want to charge a battery when it is plugged into the charger. I guess you could try another charger for the unit as it might be bad. Unlikely though if the system runs fine with the charger plugged in but it is still a possibility. If the motherboard is bad, then if you were ...

Why is my computer saying no battery detected? Most likely, faulty battery drivers are the root cause of the problem of no battery being detected. Therefore, you might try reinstalling the battery drivers to fix the ...

I feel stupid for posting a "Battery not charging question" but I've tried everything caused this problem on my past machines to no avail (tried two lenovo USB-C chargers, one brand new, two 100W USB-C wall chargers with a variety of cables, pulled the external battery > pressed/held power, disabled then disconnected internal battery > hit pinhole reset button, uninstalled ...

Had a lot of issues with "battery not detected" popups that were plaguing my ThinkPad 4th gen x1 yoga laptop. It wouldn't turn on without being plugged in or show me the current battery status (kept showing 100%). I followed these ...

I thought that there could be a driver issue, so I reinstalled the battery drivers but the issue was not solved. The laptop is charging the battery and the battery gets charged but when I unplug the charger the battery does not work. I am sure that there is not any fault with the battery because it happened just after I upgraded to windows 11.

1. Update Windows OS. You know the drill. Press on Windows key+I to open Settings and click on Update & Security. Check for updates here and download and install them. Don't forget to reboot...

Battery not being detected after new battery installed I've replaced the battery in my macbook Pro mid 2017 A1708, when I turn on the system (without power connected) I get a battery icon showing it's not charging, I plugged power/charging cable back in, and it will start up, then I went into the "system report", under "power" in the "battery info" there is no information, ...

If an AC power adapter fails, it will not recharge the battery and it will not provide power to operate the notebook, which will cause the computer to rely on the battery. Use this document to learn how to use and test your notebook AC power adapter: HP Notebook PCs - Using and Testing the AC Power Adapter

Battery not detected after reinstalling system
