Battery power usage time setting method

Since wasting PV power is not in the interest of the user, the power limitation for the battery control parameters is automatically adjusted so that no PV energy is wasted. In the above example, this means that the battery is only discharged with 2,000 W, so that the 1,000 W of PV power can be used (see Figure 4). ..... Correctly setting the time-of-use storage system ...

Method 1 - Find Battery Remaining Time in Settings. If the method above did not fix the issue, you can go to Settings and check the remaining battery time until the issue is resolved. Step 1.
