After F 2 → F1 transition, node A is connected to C11, C 21 and C 31 capacitors (and the base amplifier's input). The total charge stored on all capacitors must remain constant. We know from the F 1 → F2 transition that $Q_{11} = Q_{21}$ so it results that the charge on C 31 capacitor is also constant $Q_{31} = 0$. Similarly, we deduce that $Q_{32} = 0$. The equations ...
