While Lightning Shield is active, your Nature damage dealt is increased by 8%. In the Shaman Talents category. Learn how to use this in our class guide.

Roughly 20% crit chance so 1 or 2 ticks will crit for an extra 2-4k damage. 2 crits would bring it up to 13,818 damage for 3838 dps, not too shabby. Best used when you're low on energy, since ...

Your damage spells incite the earth around you to come to your aid for 6 seconds, repeatedly dealing Nature damage to your most recently attacked target. Flames of ...

Memento, Fox prayer. Fenris, 3 Emp Int. Kinetic momentum. 50% crit chance, 110% crit damage. 136k gun damage. 100k Turret (with 6.5 mill HP), 65k drone damage. All before any buffs from Memento and Kinetic momentum and Capacitor. Skills hit higher than my skills build before, and gun damage is awesome. 2red, 1 blue, 5yellow + 1Technician cores.

Spell Damage is a valuable quality for classes which use damaging spells. The mage, rogue and shaman classes are good examples, but every class has damaging spells and can therefore benefit from it. Spell Damage is especially important to control decks such as Freeze Mage and Miracle Rogue, as well as spell-related aggro decks such as Aggro Shaman.. Like most card ...

For ease of reference, the following are the basic formulas for calculating ranged attack bonuses, ranged damage, melee attack bonuses, and melee damage. Various other bonuses to attacks and damage can apply from class features, feats, special circumstances, and so on.

The halved damage in the spell you cited refers specifically to the spell's (fire) damage. There is nothing in the rules that says the save would protect the creature from the separate Radiant Soul ability. In your example, the fire damage from Fireball is halved, the radiant damage from Radiant Soul is unaffected by the save.

It's actually quite good for warlocks seeding above AOE cap since it bypasses the AOE cap with added flat damage. When over AOE cap, it adds about 2.5-3x the amount of DPS than the 40 crit rating from Sextant

## Capacitor Spell Damage Bonus

would (~435 vs ~134 average damage per seed cast added, regardless of mob count as long as you are over cap, could be 10, 50, 15000 mobs).

The Capacitor is a piece of equipment in Dacey Dungeons that is designed to handle large amounts of dice to inflict damage and Shock with its reusability and short countdown. ... Bonus Round (Warrior): Has a chance to appear in shops on floors 2 and 3. Bonus Round (Robot): Possible starting equipment with Princess Guard. Parallel Universe ...

Spells do NOT gain this damage bonus unless the character has a specific feature that allows their spells to benefit, like the Evocation Wizard [PHB, 117] or the Agonizing Blast Warlock feature [PHB, 110]; or if the spell specifically says so, like with Green Flame Blade [Sword Coast Adventurer's Guide, 143] specifically saying that you are ...

In the upcoming 2.1 patch, if Lightning Capacitor is affected by your +spell crit, it will effectively be a passive +131.256 Spell Damage trinket if you have 35% to crit. Better learn how to kill those chains.

Arcane Surge is a buff that grants bonus spell damage, cast speed, and mana regeneration. Arcane Surge lasts 4 seconds by default. Unless otherwise stated, Arcane Surge granted from equipment, passive skills, and Ascendancy passive skills assume a level 1 support gem: 10% more Spell Damage 10% increased Cast Speed 0.5% of Mana Regenerated per second See ...

You create a small discharge of electricity that arcs towards a creature within range. Make a ranged spell attack against the target. On hit, the target takes 1d8 lightning damage and an arc of lightning jumps from the target to another creature of your choice within 15 feet, using the same attack roll, dealing 1d4 lightning damage on hit.

Did some tests on my mage with 40% crit. using scorch and fireball and with both spells the damage it added averages out to be approximately 110 additional damage per spell cast. This is not the same as plus damage as its not being added to your spell damage it just averages out to increasing my total damage by 110 damage per spell that I cast.

You create a small discharge of electricity that arcs towards a creature within range. Make a ranged spell attack against the target. On hit, the target takes 1d8 lightning damage and an arc of lightning jumps from the target to another ...

Thunder Capacitor. Equip: You gain a Thunder Charge each time you cause a damaging spell critical strike. When you reach 4 Thunder Charges, they will release, firing a Lightning Bolt for ...

The spell attack bonus and spellcasting ability modifier are both important factors in determining the effectiveness of your spells in Dungeons & Dragons. However, they serve different purposes and are calculated differently. ... Do you add the spellcasting ability modifier to spell damage? Most spells do not

## Capacitor Spell Damage Bonus

include the spellcasting ability ...

When a successful hit is done with the Shocking Staff, it deals 1-6 physical damage and 1-3 fatigue damage. The bonus is additional hits for 1-10 electrical damage, using 2 charges per hit; In Turn Based combat the bonus is repeated until the user's APs is exhausted for the round; In Real Time combat the bonus continues until the target is killed.

You don't add your weapon damage bonus to spells it grants you. Since it's a homebrew item, its function is up to your DM. However, the only relevant damage bonus to either greataxes or call lightning are the Strength modifier to damage, and any magic weapon bonus.. As per Player's Handbook p.14, under "Weapons", Strength modifier to attack and damage ...

To see various maximum levels of bonus damage, see Maximizing Your Spell Damage. The Calculating Spell Damage page may also be of interest. Bonus elemental damage applies only to spells which deal damage of the element listed. For example, the black catseye marble adds 75 Spooky Damage to Spooky Spells only. Contents.

I am in the process of setting up the most commonly used spells and items for my parties with the new Active Effects system. I have spells like Hunter's Mark and Hex adding extra damage to attacks using bonuses.mwak.damage and the other similar Attribute Keys on toggled active effects applied to the players. Hunter's Mark adds directly to the weapon damage as it should, ...

Magic Damage is an equipment statistic that functions as a damage multiplier that increases the maximum magic hit and therefore the damage dealt by a player to a target. The effects of most equipped items can be seen at the bottom of the stats window (labelled Magic damage: +x%). Both players and non-player characters can utilize magic damage, although when casting ...

The role of the Spell Attack Bonus becomes apparent when you cast a spell that necessitates an attack roll, such as Fire Bolt or Inflict Wounds. When you execute such a spell, you roll a 20-sided die (a d20), add your Spell Attack Bonus to the outcome, and match it against the target's Armor Class (AC).

Using an example, let's see how to work out the Spell Attack Bonus for a Level 1 Warlock. Here's the calculation formula again. Spell Attack bonus = Spellcasting ability modifier + Proficiency bonus. First, we find out what warlocks use to power their spells. It's Charisma.

I agree entirely with @kviiri's answer, but here's an alternate argument with the same conclusion. Look at other spells that create weapons and see how they're worded. Do not use weapon rules: Blade Barrier, Cloud of Daggers, Guardian of Faith, Magic Missile: doesn't use the word "weapon", and specifies a non-attack method of damage.

1.00 Lightning Bolt = 1125 Average Damage. 8.571 spells = 1125 Average Damage. (1125 / 8.571 ) =

## Capacitor Spell Damage Bonus

131.256. In the upcoming 2.1 patch, if Lightning Capacitor is affected by your +spell crit, it will effectively be a passive +131.256 Spell Damage trinket if you have 35% to crit. Better learn how to kill those chains.

The effect of this trinket is badly expressed as spell power, but rather as a flat crit-damage bonus and can easily be calculated as dps-gain, ... thus The Lightning Capacitor is theoretically adding 153 spell power or 11.36% spell crit (251.056 Spell Crit Rating). This spell power or spell crit is unaffected by the base spell power in the ...

For mages, and any other class that uses a single target, direct damage spell as their primary nuke, my calculations result in the following formula for calculating the +dmg necessary for an equivalent trinket: let: C = the crit rate for your nuke spell (e.g. 30% => 0.3) B = the crit bonus for your nuke spell (e.g. 100% => 1.0)
