Schroders Greencoat has revealed today (25 January) that it will complete the UK's "largest-ever solar acquisition", securing 53 solar farms from Toucan Energy. With a combined capacity of 513.5MWp across sites in England, Wales and Northern Ireland, the two companies secured the acquisition in a £700 million deal.

Over the past 15 years, China has come to dominate the global market for solar energy. Nearly every solar panel on the planet is made by a Chinese company.

China is the world's largest manufacturer of solar panel technology, points out Yvonne Liu at Bloomberg New Energy Finance, a market research firm.

If the Das Solar acquisition is completed, Ningde-based CATL would join Tesla and BYD in being able to generate energy through its own PV modules, store energy with its energy storage batteries, and consume energy at its battery charging and swapping stations. ... China Helps Saudi Arabia Explore Uranium Ore Amid Alternative Energy Push. Xu Wei /

Bluefield Solar's second acquisition includes the grid connection and associated land area of a fully consented, ready-to-build 45MWp solar asset and co-located 25MWp battery project. This was acquired for around £5m (\$6.9m) from Equans, the renewable energy firm formerly known as Engie Renewables.

This is the second acquisition the company has announced since its £122.5m floatation on the London Stock Exchange in December 2020. The company has now deployed a total of £102m. Additionally, DORE has entered into an exclusivity agreement to acquire a 40% stake in a Swedish near-shore windfarm project with 100MW capacity.

Solar panel rollout to 2030 is set to be less than half the potential supply. The solar panel manufacturing industry could supply an estimated 7,310 gigawatts (GW) of solar panels between 2024 and 2030. Deployment over the period is forecast to be 3,473 GW.

The potential bidders -- including a German unit of LONGi Green Energy Technology Co Ltd., the world's second-most valuable solar firm -- all signaled late that they will withdraw, according to a statement from EU industry commissioner Thierry Breton. The others are Shanghai Electric UK Co. Ltd. and Shanghai Electric Hong Kong International ...

"Overcapacity"-As countries around the world race to convert their power systems, China's solar supremacy has become a growing concern. The United States and other Western countries have accused Beijing of deliberate "overcapacity" and flooding global markets with cut-price solar exports intended to undercut competition.. Washington has doubled tariffs ...

A total of 279 Mergers & Acquisitions (M& A) deals (pending and completed) were announced in the Technology, Media and Telecom of China, in the last twelve months resulting in a total deal value of over \$15,058.0 million. In the LTM period, August 2021 turned out to be the most prolific in terms of deal size, with a total deal value of \$1,830.9 million, resulting in an average deal ...

China's top 5 firms in the solar PV industry are JinkoSolar, JA Solar, Canadian Solar, LONGi, and Trina, whose annual manufacturing capacity on average each surpassed 8 GW in 2018. Jinko Solar increased manufacturing capacity to 11 GW as of March 2019 and LONGi has a goal of reaching a module capacity of 16 GW by the end of 2019, in addition to ...

China's goal to achieve carbon (C) neutrality by 2060 requires scaling up photovoltaic (PV) and wind power from 1 to 10-15 PWh year-1 (refs. 1-5). Following the historical rates of ...

In addition to bringing a deal pipeline exceeding 80 megawatts (MW) of projects in development, the acquisition provides Catalyze with greater origination resources and deeper solar development ...

Countries and regions making notable progress to advance solar PV include: China continues to lead in terms of solar PV capacity additions, with 100 GW added in 2022, almost 60% more than in 2021. The 14th
