The high and low voltage distribution cabinet is usually connected with high-voltage or low-voltage cables. It is used for power stations, substations and other facilities. It uses high-voltage cabinet, and then depressurizes through the transformer to a low-voltage cabinet, and then to each power distribution box.

China Solar High and Low Voltage Distribution Cabinet

We are a leading one-stop solution provider for distributed photovoltaic power station systems in China, dedicated to professional production factories in the research and development, ...

GCK (L) series low-voltage withdrawable power distribution cabinet meets the standards of IEC 60439-1, GB7251.1-2013, GB7251.12-2013 and JB/T9661-1999.

Since the low voltage cabinet can effectively improve the power factor of the power load, reduce the line loss, improve the actual load capacity of the transformer, and has significant energy saving effect, and adopting a specific reactor in the system, the harmonic amplification and effective absorption can be effectively prevented.
