1 · In the meantime, traditional energy companies in China have also been accelerating digitalization with many of the country's traditional energy behemoths—such as China National Petroleum Corp, China Petroleum and Chemical Corp, China Southern Power Grid and State Power Investment Corp setting up digital companies to accelerate digital transformation.

Variable renewable energy (VRE) and energy storage systems (ESS) are essential pillars of any strategy to decarbonize power systems. However, there are still questions about the effects of their interaction in systems where coal's electricity generation share is large. Some studies have shown that in the absence of significant VRE capacity ESS can increase ...

Teaming up with China Southern Power Grid Co., Ltd (CSG) - one of two state power grids in China, operating in the southern provinces of Guangdong, Guangxi, Yunnan, Guizhou and Hainan - Hitachi Energy is supplying key technologies to support CSG's first trial VPP system solution in a 110 kilovolt (kV) substation in Shenzhen. CSG is tackling rapid load growth in ...

The cooperation with China Southern Power Grid Energy Storage is expected to accelerate the development of battery swap network and deepen the joint contributions to a new power system. In the future, the two ...
