The bottom line is that my Output transformers on my EL34 SET really like Cathode feedback. and I need to pick the best capacitor I can. currently I have two Rubycon 470uf non Blackgate caps in there, and I don"t know what is ideal! What is the science behind choosing a Capacitor value? I have never heard a good explaination.

o All capacitors block DC, but the selection of a capacitor for a specific application is often a time-consuming process. One option is iterative testing of different capacitors and measuring the performance. Alternatively, one can speed the selection by using a capacitor capable of blocking across a wide frequency range.

If the tone is too dark, try a .015 or a .01uf capacitor instead. If your tone is too bright, try the .033 or .047uf capacitor. Choosing the Capacitor That"s Best for You. There are many types of capacitors available to the guitar player, including ceramic disc, mylar, paper in oil, aluminum, and more.

impedance (Z C), capacitor RF current (IC), power dissipated by the capacitor (P CD) and reflection coefficient (r) will be considered.
