Domestic capacitor company official website

Nippon Chemi-Con Corporation is the worlds largest manufacturer of aluminum electrolytic capacitors. The company offers various types of electronic components such as ...

The large capacitor is held onto the A/C frame with metal plumbers tape. The capacitors are not wired in any special way and if you just remove one wire at a time, and place it on the new capacitor you won't have any issues. Keep in mind that capacitors store energy, so use some needle nose pliers to remove the wires so you don't get zapped.

Domestic capacitor company official website

However, you CAN replace just the fan capacitor by itself by moving the lead from the F or Fan terminal on the existing capacitor to your new capacitor, and then adding a jumper from the C or Common terminal on the old capacitor to the new capacitor. But FWIW - the units you have are probably better built than anything that you can buy ...
