What to do if a fire or emergency occurs - Call Triple Zero (000) immediately if fire or smoke is evident. Fire or smoke . If your lithium-ion rechargeable device is on fire, or smoke is coming from it: Evacuate to a safe area and then call Triple Zero (000) immediately. Don't touch a damaged battery or device - severe burns could occur.

Why do lithium-ion batteries catch fire? Lithium-ion battery cells combine a flammable electrolyte with significant stored energy, and if a lithium-ion battery cell creates more heat than it can effectively disperse, it can lead to a rapid uncontrolled release of heat energy, known as "thermal runaway", that can result in a fire or explosion.
