

Factory Solar Installation

The Interstate 19 includes a 250-watts of solar on the roof. As a rule of thumb, your solar panels will generate electricity for an average of four hours per day on an annual basis. A solar charge controller protects the batteries from being overcharged by disconnecting the solar power feed when it senses that they are fully charged.

Geo Green Power offer expert commercial solar installations for all types of buildings. Factories, warehouses and industrial buildings often have significant roof space, and high energy usage, making them ideal locations for solar panels.

More and more people are getting interested in Solar PV Installation due to its offer guaranteed return of investment. Although it's true that getting started with solar power would be very easy, just like any other businesses, it would still be a lot better if you fully understand various aspects of the business first before you try to venture into it.
