The problem is that many manufacturers or resellers tend to inflate the mAH capacity of batteries over what they actually have and this is realistically impossible for the average user to test. If you get a battery from a tier 1 manufacturer that has a higher mAH rating then yes it will probably last longer than the OEM one.

Background: Pacific Batteries was established in 1965 and is a 100% Fijian, locally-owned company. The company is ISO 9001:2008 QMS Certified and has set up a battery recycling plant in 2009. 99% of Pacific Batteries" employees ...
