

# High power battery export tax rebate policy

In 1985, China established an export tax rebate policy to encourage exports and enhance its foreign exchange reserve. Since then, China has frequently amended its export tax rebate policy to reduce the fiscal burden of the government and modify its export structure. As a result, there have been many variations in the rebate rates across industries.

Find information related to electric vehicle or energy storage financing for battery development, including grants, tax credits, and research funding; battery policies and regulations; and ...
