Typical homes have high energy demands in the mornings and evenings but solar generation is highest mid-day. Without a home battery, the solar energy produced in the daytime would be wasted. A home battery allows you to store solar energy and use it whenever you need it.

The two battery storage facilities installed in Tonga are complementary: the aim of the first 5 MWh / 10 MW battery is to improve the electricity grid's stability (regulating the voltage and frequency), while the second 23 MWh / 7 MW battery is designed to transfer the electrical load in order to help the grid supply electricity at peak times, and notably in the evening.

The special event today marks the official opening of Tonga's first ever large-scale Battery Energy Storage Systems (BESS) by the Guest of Honor for the event, Honorable Huakavameiliku - Prime Minister for the Kingdom of Tonga. ...

Batteries aren't the only form of home energy storage. If you've experienced a power outage in the past, you may have already invested in a generator. But home backup batteries are becoming an increasingly popular choice over home generators. They offer many of the same backup power functions as conventional generators without the need for ...
