More compact than a flashlight and lighter than an average pen, penlights for nurses are one of the most important pieces of gear for medical professionals. Being a doctor, EMT or a nurse is an extremely hard job but luckily there are some tools that make the day to day a bit easier. A penlight is one of these tools and most medical professionals will find ...

The human pupil regulates the amount of light that reaches the retina and profoundly impacts vision. Pupil size, denoted by the diameter of the black circular opening at the center of the iris, is modulated by a dynamic balance between the iridic constrictor and dilator muscles. These muscles respond to various inputs, including levels of ambient light, visual ...

To avoid this, the best vape pen batteries put in safety features. Where necessary, we include a shutdown voltage that restricts the battery from going beyond a preset output. This avoids overheating so the battery ...
