An Energy Performance Certificate shows potential buyers or tenants how energy efficient your property is. To get an EPC a qualified energy assessor will visit your home and carry out some tests to rank it's energy efficiency from A to G taking into account the performance of everything from your boiler to your loft insulation and include recommendations on how to improve the ...

Solar engineer certification is a professional certification that recognizes the knowledge and skills of individuals who work in the field of solar energy. This certification is designed to ensure that professionals who are responsible for designing, installing, and maintaining solar systems have the necessary qualifications to do so safely and effectively.

Solar Energy UK has strong partnerships across the value chain and is working to increase UK solar capacity to 70GW by 2035. Members benefit from opportunities for peer-to-peer engagement, and access to member-only resources which include a database of local planning guidance, a league table of energy export tariffs and a business profile in Solar ...

This study explores sustainable development and achieving net-zero emissions by assessing the impact of solar energy adoption on carbon emissions in 40 high and upper middle-income nations and 22 low and lower middle-income countries from 2000 to 2021. Dynamic GMM analysis reveals substantial potential in mitigating emissions, with a 1% ...
