How to solve the problem of new energy battery smoking

Its mating surfaces had corrosion. I simply removed the disconnect. The moral here is not to go all out with add on fixes. Just fix what is actually a pretty simple problem. With a clamp meter it won't even take 10 minutes to find it. As soon as you have located and fixed the problem, put a new battery in. The old one is almost certainly toast.

The rapid development of the new energy vehicle industry is an essential part of reducing CO2 emissions in the transportation sector and achieving carbon peaking and carbon neutrality goals. This vigorous development of the new energy vehicle industry has generated many end-of-life power batteries that cannot be recycled and reused, which has brought ...

The liquid pooled, like smoke along a ceiling, and then as the last of its heat bled out, solidified into a shelf of an igneous rock geologists call peridotite. Over the eons, it was lifted by ...
