

Lightweight laser battery

The battery enables you to use the C5L for roughly four hours; the pulsing laser mode can last seven hours or more, while the tac laser and light mode lasts 60 minutes. The laser is constructed out of aircraft-grade aluminium so you can be sure it can withstand use. It has an ambidextrous switch, constant beam pr multiple pulsing modes.

The Fenix TK30 white laser light boasts an incredible effective range of nearly 3/4 of a mile (3,900 ft/1200 meters). The TK30's exceptionally long visibility is enabled by a white laser light source that produces an amazing 363,866 candela output in a precisely focused beam. This flashlight incorporates a battery leve

Batteries have a major say in how intense a laser pointer's light is. And the battery capacity ascertains the endurance of the device. If you use your laser pointers extensively for work, recreationally, etc., keep a few spare batteries handy because you may never guess when the existing power pack runs out of juice or dies completely.
