First, charging Lithium ion battery requires special circuitry that the UPS does not have. At best it will ruin your pack, at worst it might burn down your house. Second, ups are designed to be plugged in indefinitely. This is a big problem for lithium chemistry, because keeping a full charge will stress the battery pack, which will degrade ...

In Lead Acid battery the revival of battery from deep discharge is very easy but in the Lithium battery the deep discharge of the battery generally is the end of lithium battery. Pure Sinewave Technology: A pure sine wave inverter is an electronic device that converts direct current (DC) from a battery or other source into alternating current ...

DETAILS: Lithium Batteries + 3,000w Inverter. ... Run two equal length cables from the fuse to the positive terminal on each battery (see photos). This keeps the batteries in balance and also reduces the load of each cable to approximately 50%, which is why these cables can be 1/0 AWG instead of 2/0 AWG. Custom make
