This tutorial is about designing a solar power plant for residential purpose. watch next three tutorials to understand and learn full design.

Let's assume you decide to install Renogy's 320-watt solar panels. All you have to do is divide the total power output of your desired system by the power output of a single solar panel (from the manufacturer of your choosing). In this example, we want to install a 5165-watt solar system using Renogy's 320-watt solar panels.
