Die elektrische Kapazität ist eine physikalische Quantität, die die Fähigkeit eines Kondensators angibt, Ladung zu sammeln. Sie wird ermittelt, indem die elektrische Ladung Q durch den Potenzialunterschied zwischen Leitern dividiert wird: $C = Q/U$ Hier ist Q die elektrische Ladung, die in Coulomb (C) gemessen wird, und U ist der Spannungsunterschied, der in Volt (V) ...

Trimmer capacitors are variable capacitors which serve the purpose of initial calibration of equipment during manufacturing or servicing. They are not intended for end-user interaction. Trimmer capacitors are almost always mounted directly on the PCB (Printed Circuit Board), so the user does not have access to them, and set during manufacturing using a small screwdriver.

Giga-Trims are tiny trimmer capacitors which provide a straight-forward technique for fine RF and microwave circuits by eliminating time consuming methods of abrasive trimming, cut and try adjustment techniques, and ...
