Bahamas Power and Light Company Limited (BPL) will leverage a battery ...

The Davis Administration today opened the bidding process globally for the construction of renewable power grids on New Providence. The launch of requests for proposals (RFP) for New Providence New Energy Generation via Microgrid, Clean Fuel and Renewables comes just over a month after the same was launched for the Family Islands.

A similar RFP for solar projects on New Providence was also advanced. "Approximately 70MW of solar power and 35MW of battery energy storage systems will be integrated into the existing grid," she said. "Twenty-five megawatts of the solar energy will be paired with the 25MW of battery energy storage system at the Blue Hills Power Station.

Solar power technologies harness the energy from the sun's light and converts it into electricity. Solar photovoltaic panels, (Solar PV panels), are made up of individual cells made of silicon or other special material. When the sun hits the solar panel the photons from the sunlight are absorbed by the cells, creating an electric field and causing electricity to flow.
