New Energy New York will help the U.S. meet the demand for domestic battery products by accelerating the battery development and manufacturing ecosystem in the Central, ...

A new battery has a specified capacity to provide power. This capacity is referred to as the cranking amps rating of the battery. As a battery ages, the actual amps that a battery can supply becomes lower than its original rating * Once the cranking amps fall below a critical threshold, it will be difficult or impossible to start your car.

Please note: We are unable to quote exact repair prices via email or telephone as actual parts needs cannot be determined until our technicians have had an opportunity to review your timepiece. Turnaround time varies by time of year, but generally runs about 10 to 12 business days (not including transit time) after approval and
