

The patent data used in this paper are derived from the patent retrieval and analysis system built by the State Intellectual Property Office of China (SIPO). Scholars usually use the international patent classification number (IPC) or keywords search method, or combine the two methods when searching for new energy vehicle technology patents.

TOB New Energy - Professional button battery equipment, pouch cell lab equipment, cylinder cell lab equipment, supercapacitor lab equipment, electrode preparation for pilot line manufacturers and suppliers in China. We warmly welcome you to wholesale quality equipment at competitive price from our factory here.

Analyzing the technological focus of the principal applicants for HFC patents from 2003 to 2022 (Fig. 6), we observe that the Dalian Institute of Chemical Physics, Chinese Academy, excels in the H01 M category, which pertains to methods or devices for the direct conversion of chemical energy into electrical energy, such as ...

TENER is a bit like Tesla"s Megapack, in that it"s a big battery pack housed within a metal box that"s designed to store energy from intermittent renewables such as solar and wind. CATL has ...

Dragonfly Energy has received a formal notice of allowance for a new U.S. patent for the design of the Company's innovative GC3 12V 270Ah LiFePO4 deep cycle battery pack; The design steps outside the traditional lead acid forms, enabling custom installations to have more flexible solutions, and increased energy density for ...

[Technology Leadership Series 1: Long-standing Industry Experience and Patents] When it comes to innovation, LG Energy Solution is one of the few true battery pioneers. Back in 1992, it became the first Korean company to research rechargeable batteries, and over the years, LG Energy Solution has solidified its leading position in the ...

Regulations on the Comprehensive Utilization of Waste Energy and Power Storage Battery for New Energy Vehicles (2019 Edition) ... In 2018, lithium-ion battery patent families accounted for 45% of all battery-related patents. After 2009, battery pack technology in automotive applications has developed a lot. Although the automotive ...

A new energy and battery box technology, applied in the direction of secondary batteries, battery pack components, circuits, etc., can solve the problems that the ...

Justia - Patents - Patents and Patent Application Resources. Abstract: Systems and methods of the various embodiments may provide a refuelable battery for the power grid to provide a sustainable, cost-effective, and/or operationally efficient solution to energy source variability and/or energy demand variability. In particular, the systems ...

New energy battery box patent

It is an enterprise integrating plastic mold opening and injection molding of new energy auto parts and battery box production and processing. Specializing in the production of: button battery holder, battery box, battery buckle, metal battery and other battery accessories and plastic products injection molding.

Patent application trend of power battery in new energy vehicles 3. Figure 4. Patent applicants ranking for power battery applications in new energy vehicles 4. 4.3.

Shenzhen Elite New Energy is committed to provide customers with safe and durable green energy products, including EV power battery systems, portable energy storage, home energy storage, micro power grid, battery solutions for telecom station power supply, UPS, solar street lights, and battery packs for police car, harvesters, AGV, forklift ...

Moreover, redox flow batteries are emerging as the most exciting new battery technology for grid storage, with patent activity doubling since 2014, to 894 in 2019 (also above). Hence we include notes on ESS Inc. A description of each battery type is shown in the "battery types" tab. Download the data-file for a break-out of the data by country.

The success of a battery patent application relies on the seamless integration of technical expertise and legal acumen. Partnering with experienced legal professionals who possess a deep understanding of battery technology and patent prosecution is paramount. Your legal team must adeptly identify novel features, ...

This study takes a new energy vehicle as the research object, establishing a three-dimensional model of the battery box based on CATIA software, importing it into ANSYS finite element software, defines its material properties, conducts grid division, and sets boundary conditions, and then conducts static and modal analysis to obtain the ...

If successful, Ponec and his start-up Antora Energy could be part of a new, multi-trillion-dollar energy storage sector that simply uses sun or wind to make boxes of rocks hot enough to run the ...

Tulip Innovation Kft. has announced the launch of a new licensing program aggregating patents related to lithium-ion battery technology from LG Energy Solution, Ltd. (LG Energy Solution) and Panasonic Energy Co., Ltd. (Panasonic Energy). Tulip's new licensing program is based on a combined portfolio of more than 5,000 LG Energy ...

New energy vehicles rely on batteries as their primary power sources. Lead-acid and nickel-metal hydride batteries consider factors such as battery cost, power ratio, cycle life, and manufacturing ...

Today, BYD officially announced the launch of the Blade Battery, a development set to mitigate concerns about battery safety in electric vehicles. At an online launch event themed "The Blade Battery - Unsheathed to Safeguard the World", Wang Chuanfu, BYD Chairman and President, said that the Blade Battery reflects BYD"s...

[1] [2][3] As a sustainable storage element of new-generation energy, the lithium-ion (Li-ion) battery is widely used in electronic products and electric vehicles (EVs) owing to its advantages of ...

BYD Announced Two Solid-state Battery Patents. Home; About Us; Products. Energy Storage System; LiFePO4 Battery Pack; Golf Cart Battery; Prismatic LiFePO4 Cell; 18650 Battery Cell; Solar System; ... Lead New Energy Co., Ltd. has always been with you! Address. Room 2013~2020, China South Development Center, No.1, ...

A technology for new energy vehicles and battery boxes, applied to battery components, circuits, electrical components, etc., can solve problems affecting battery life and ...

Tulip Innovation Launches New Patent Licensing Program based on LG Energy Solution and Panasonic Energy Lithium-Ion Battery Technologies Battery manufacturers now have an efficient and flexible way to access rights under broad patent portfolios of more than 5,000 patents encompassing critical IP from two industry ...

As can be seen from Figure 3, the development of Chinese new energy vehicle patents can be divided into three stages: 2002-2010, the number of new energy vehicle patents issued was small; 2011-2015, the number of new energy vehicle patents issued increased from 44 to 237, and the annual growth rate was 52.3%; 2016-2020, ...

Scientists have created an anode-free sodium solid-state battery. This brings the reality of inexpensive, fast-charging, high-capacity batteries for electric vehicles and grid storage closer than ...

The utility model discloses a new energy battery box, which relates to the technical field of battery boxes and comprises a battery box body, wherein a box cover is hinged to the...

BUDAPEST, Hungary -- Tulip Innovation Kft. today announced the launch of a new licensing program aggregating patents related to lithium-ion battery technology from LG Energy Solution, Ltd. (LG Energy Solution) and Panasonic Energy Co., Ltd. (Panasonic Energy). Tulip''s new licensing program is based on a combined portfolio of ...

Therefore, this paper will use patent analysis method, collect domestic 2002-2019 new energy vehicle patent data, analyze the current situation of china's new energy vehicle industry technology innovation from China's new energy vehicle patent application number, patent application trend, patent technology features, patent ...

The utility model discloses a new energy automobile battery box, relating to the technical field of new energy, comprising a box body, the upper surface of the box body is fixedly...

However, this new cathode doubled the operating voltage of TiS 2 and thus led to a significantly higher

New energy battery box patent

energy density. Among the many cathode materials, LCO is the most successful for portable ...
