SolarStop powder-coated, bolt-together aluminum structure; GSX BiFi Solar Module System Roof; Power Bench with (3) wireless mobile device chargers, from the battery and off-grid solar components; Bluetooth programmable LED lighting (3) Full Height Laminated Safety Glass Panels; Easy to add options include:

Solar charge controllers have a current rating, which should always be higher than both the maximum current of your solar panel (I_{mp}) and the total current of your load (in our case $22 \text{ Watts} / 12\text{v} = 1.8 \text{ Amps}$). I went with an oversize 30Amp charge controller, to allow connecting a second battery and solar panel in parallel should I ever want to. Again, make sure battery, ...

The solar system - including the panels, solar inverters, mounting equipment, and necessary wiring - will have an installation cost of \$3,500 to \$9,000. This assumes a solar panel kit between 3.5 kW and 6 kW in size - enough to power a small to medium sized home - and a cost per watt of \$1.50 for the solar panel kit.
