In some cases, more highly functional low voltage distribution equipment is needed to best protect, control and monitor critical power electrical distribution systems safely and efficiently. In these instances, low voltage switchgear is often the optimal solution. Low voltage switchgear provides centralized control and protection

Power distribution voltage regulators maintain power distribution system voltages within a defined range. Regulated voltages ensure that electrical products and equipment will operate optimally. Voltage regulators provide 32 steps, 5/8ths percent per step, for a total regulation of +/- 10% of system voltage.
