If the lithium battery is packed with the equipment but not installed: Follow the same steps as above for the equipment. Place the battery in inner packaging (e.g., a sealed plastic bag) to prevent short circuits. Secure the battery to the equipment or within the packaging to prevent movement.

Battery capacity decreases during every charge and discharge cycle. Lithium-ion batteries reach their end of life when they can only retain 70% to 80% of their capacity. The best lithium-ion batteries can function properly for as many as 10,000 cycles while the worst only last for about 500 cycles. High peak power

But at 30-40% price difference it's hard not to consider some of these other companies jumping in. 4 100AH batteries at \$1000 each vs \$600 each is a huge money saver. How does one even know if a lithium 12V house battery is any good?

Established: 1995 Company Profile: BYD is a China-based company primarily focused on battery and electric vehicle technology D has crafted a strong brand image and market position through the efficient use of eco-friendly options.
