Solar array mounted on a rooftop. A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow through a circuit and produce direct current (DC) electricity, which can be used to power various devices or be stored in batteries.

The federal tax credit covers 30% of a consumer's total solar system cost, which means you could get \$6,000 for a solar installation with a price of \$20,000.
