Solar Projects (150+) VLSI Projects (180+) Wireless Projects (100+) Zigbee Projects (120+) Categories. Communication; Electrical; Electronics; Project Ideas; Robotics; Technology; Recent Comments.

The EcoFlow system consists of a battery and inverter with a total output of 7,200 watts. Like the Anker, it's scalable, all the way up to 90,000 watts with the addition of 15 batteries.

The price for such a system is quite high, as these inverters are usually more expensive. Also, you'll need more solar panels and a bigger battery to power your home for a few hours during a power outage. I recommend allowing power supply only for essential circuits in such situations, such as the refrigerator, a few lighting installations.
