For most, prefab cabins are small enough that they can go in a backyard space. If you do not have land already, make sure that you have a piece of land that is spacious enough to accommodate. Because of the size of the prefab cabins, you can get away with a relatively small piece of land, so costs shouldn't be too high.

Step 1: Design. I recommend purchasing blueprints from sites like Etsy. I love this 1400 sq ft beauty. This way, you spend your time on the build for the low cost of ~\$100.

Prices start at EUR18,700 (approximately \$23,000) for the smallest model, not including taxes, import duties, or transportation costs.
