Here are the steps for wiring your 12v solar panel system: Mount the RV solar panels to the roof. Decide whether these should be wired together in series or parallel. ...

If I wanted to spend crazy extra money on the wire, I could have wired the solar panels in parallel, each panel straight to the controller, and used (big) PWM controllers. I can't even imagine how I could pull four very thick wires down from the roof to the batteries. If I did not increase the wire size, then 45 amps could have burned through a thin wire. Even worse, had ...

The solar wires are key to power in RV solar systems One item that needs to run from the RV's roof down to the charge controller when installing solar panels is the solar wires. RV solar wires are specialized wires that connect solar panels to the RV power system. Today most RV cables use MC4 or MC3 connectors. These connectors allow for watertight quick-connects for solar ...
