

# Ranking of the top ten battery supply chain companies

This article will provide a detailed introduction of the top 10 power battery companies in the world in 2021 based on the installed capacity rankings in the first half of 2021. ... It has also become the first lithium-ion battery manufacturer in China to enter the supply chain of international top car companies.

In the first half of 2021, the company's installed capacity of power batteries ranks among the top ten. With domestic companies including CATL, Yiwei Lithium Energy and other companies increasing the layout of soft ...

The top 10 producers are all Asian companies. Currently, Chinese companies make up 56% of the EV battery market, followed by Korean companies (26%) and Japanese manufacturers (10%). The leading battery supplier, CATL, expanded its market share from 32% in 2021 to 34% in 2022. One-third of the world's EV batteries come from the Chinese company ...

In the first half of 2021, the company's installed capacity of power batteries ranks among the top ten. With domestic companies including CATL, Yiwei Lithium Energy and other companies increasing the layout of soft-pack batteries, and the cost of batteries brought by the localization of aluminum-plastic films Soft-pack power battery companies ...

The NREL-developed-and-managed Lithium-Ion Battery Supply Chain Database showcases key areas for coordination between supply chain companies, such as linking end-of-life facilities with midstream manufacturing capabilities. "This database is an important step in better understanding the lithium-ion battery market and its North American ...

China's lithium-ion battery market is also booming. As of September 2021, there are 47,400 lithium-ion battery companies. In the past 10 years, the overall registration of lithium-ion battery companies in China has shown an upward trend.

Players in the battery value chain who want to localize the supply chain could mitigate these risks through vertical integration, localized upstream value chain, strategic partnerships, and stringent planning of manufacturing ramp-ups. The battery value chain is facing both significant opportunities and challenges due to its unprecedented growth.

Finland placed the highest in Europe and was ranked fourth in the overall rankings. The country's growing battery metals supply chain, relatively clean grid and quality infrastructure favorably positions it among top lithium-ion battery countries. Germany and Sweden's lack of domestic raw materials led to a drop in their rankings in 2022.

Six Chinese companies - CATL, BYD Co., CALB Co., Gotion High Tech, Sunwoda and Farasis Energy -
