MALCOLM TAYLOR | Oct 06, 2021 03:08pm | #4. Elizabeth and dgsmills, That"s something I've wondered about too. The fastener schedule for the metal roofs I install do not assume there will be additional loading or wind uplift from solar panels, and there are no provisions for them in their installation manuals.

A house protected by Solarbord® Radiant Barrier Sheathing has a head start on comfort. Up to 97% of radiant heat from the sun is reflected by Solarbord, so the attic can be up to 30° cooler. This means the rest of the house will be cooler too. Cooler attic = cooler house.
