Looking ahead, Rusal anticipates a global aluminium surplus of around 500,000t in 2024, which is expected to narrow to 200,000-300,000mt in 2025. Last year, Rusal said it plans to build an alumina production facility, with an investment of Rbs400bn to help reduce raw materials imports.

Thus, within a few years, Russia may have a large mining project that will fully -- and even abundantly -- meet its current domestic demand for lithium. According to Rockwood Lithium, one of the world's key lithium ...

They said, "the element delivers a stable voltage output of 1.25 V and a capacity of 110 mAh g<sup>-1</sup> over 800 cycles with only 0.028% loss per cycle."

Most of the world's current lithium output is locked away in long term deals as downstream chemicals producers, battery makers and EV companies are frantically trying to secure future supply.

The move would enable it to start extracting lithium from captive raw material by the end of 2021 and to market the products by as soon as 2023. Rosatom is considering the acquisition of lithium mineral assets in Africa and Latin America and plans to process the extracted metal in Russia, with the saleable products marketed globally.
