About 74 billion kWh (or 73,619,000 MWh) were generated by small-scale, grid-connected PV systems in 2023, up from 11 billion kWh (or 11,233,000 MWh) in 2014. Small-scale PV systems have less than 1,000 kilowatts of electricity-generation capacity. Most small-scale PV systems are located on buildings and are sometimes called rooftop PV systems.
