Subscribe to Our Newsletter; Fountain ...

Aeration can also reduce the number of pond algae through a variety of processes. Through aeration, algae spores can be mixed towards deeper lake and pond areas, reducing the amount of time it is exposed to valuable sunlight and availability to grow. Another important benefit of aeration is the reduction of Phosphorus (P) concentrations in ponds.

Water Aeration Systems The most advanced solar powered aeration systems on the global market! ... Heathland Group is a long-established aeration equipment company. We specialise in high-quality, long-life aerators for ...
